ArbiCard WhitePaper

Current scenario of online poker

- As more and more poker enthusiasts get tech savvy and more mobile-based platforms are coming up, the Online Poker market is growing at a fast rate.
- The online gambling size was expected to reach USD 153.6 bn dollars in 2030, and online poker is a huge chunk of online gambling.
- Half a decade back, the online poker industry encountered some slowdowns due to regulatory controls, but after efforts made by online poker rooms to improve transparency and fair play, more and more gamers are encouraged to playing online.
- There have also been artain legislative reforms that have made online poker more organised and attractive for players.
- Ease-of-play, convenience and safety of funds are the main factors that decide the success of any online Poker room.
- With such provisions available in the market, many gamers from different regions, including Canada, U.S.A., Asia , Latin America, Europe, and Australia are joining.
- As online payment and fund transfer is becoming available to users in various regions and as access to the internet and mobile devices is on a rise, online poker market is set to see another wave of surge.
- Introduction of blockchain technology brings the potential to take online poker to the next level, by improving the transparency and fair play factors.
- ArbiCard NFT is a collection of digital artworks (NFTs) running on the Arbitrum network.
- Furthermore, as the ArbiCard NFT smart contract runs on the Arbitrum network, there is no ability to undo, reverse, or restore any transactions.

ArbiCard, the NFT

- At mint, you will receive a card nft, this is the ArbiCard. There will be a rarity based on it's attributes.
- You can stake this card to get $FLOP token and access to enter exclusive tournaments, where only holders can participate and there will be grand prizes.
- When you buy a ArbiCard, you're not simply buying an item or a provably-rare piece of art.
- You're gaining membership access to the ArbiCard Club

$FLOP Token, the fuel of the economy

- $FLOP tokens are the core of ArbiCard Gaming Universe.
- The larger our universe becomes, the more utility our token will develop. Holding a ArbiCard means being a pioneer in the largest and fastest growing online Poker Site. A fantastic community and amazing utility make $FLOPs one of the most important token to hold. Discover the real universe on the blockchain with $FLOPs.
- Every Staked ArbiCard gains X $FLOP per day.
- $FLOPs tokens are not just infused with utility. They also form the basis for influence and voting on the Decentralised Autonomous Organisation (DAO).
- In total, 1 billion $FLOP will be available in the system.

OWNERSHIP

- You Own the NFT. Each ArbiCard is an NFT on the Arbitrum blockchain. When you purchase an NFT, you own the underlying ArbiCard, the Art, completely.
- Ownership of the NFT is mediated entirely by the Smart Contract and the Arbitrum Network: at no point may we seize, freeze, or otherwise modify the ownership of any ArbiCard.

Exclusive Holder Reward – EHR

- Exclusive Holder Reward is a reward that gets every holder depending on the rarity of its attributes.
- By buying a ArbiCard NFT a user pays for a lifetime club membership.
- ArbiCard club operates in web 3.0 Poker site, holders have the power to vote and decide how the rewards should be managed.
- EHR - Exclusive Holder Rewards can mean various benefits and rewards that $FLOP-s DAO comes up with.
- Historically there have been issues that have bothered online gamers, even though the market still is going strong with many new players from existing and new regions joining poker rooms
- We believe in a healthy gaming environment that is based on transparency and security

Control over funds and withdrawals

- Delays and rigidity in funding of poker accounts and withdrawal of funds discourage players from playing online.
- Often there are various bank regulations, requirements of payment processors, and rules set by poker rooms that reduce players' control over their own funds.
- In extreme cases, funds were frozen, or accounts banned, and in some cases, the transaction charges were very high.

The game logic is unclear

- Poker is all about fair play, and there have been instances of rigged or fraudulent poker rooms who minted money at the expense of recreational players.
- Some issues related to technology cover doubts regarding random number generation and fraudulent rooms hosted by some poker room companies.

Fraudulent or biassed practices

- A good poker room not only ensures that there is transparency in play, random number generation and fairness in technology, but they also audit the play of the players in their poker rooms.
- They ensure that no person, bot or group of players are playing individually or in collusion at the expense of recreational players.
- Smart-money pump in by such fraudulent entities have been a cause of concern among online poker communities.
- Fair play rooms also Ensure that they do Not give undue advantage to big players in the poker rooms.
- With Staked ArbiCard NFT the Player Earn our exclusive coin ($FLOPs)(And can play in our site).

Random number generation and Fair play

- ArbiCard Poker rooms are powered with blockchain technology, ensuring that the game is fair, the shuffle is random, and that there are no fraudulent players in the online poker room.
- Most of the poker software appear to be generating random numbers, while they are based on a certain algorithm that can be exploited.
- The seeds from all the players are processed together in the random number generator. The data from the server is forwarded to a smart contract. The players can Verify the transparency of the whole process.

Anonymity

- ArbiCard poker maintains anonymity of the gamers.
- We do not collect unnecessary data at the time of registration, simplifying the whole process, and eliminating the risk of exposing the users to undue attention.

ArbiCard Poker's business plan and way forward

- ArbiCard Poker is bringing together the best of Poker with that of cryptocurrency.
- Powered with blockchain technology, this platform has the potential to deliver to a large consumer base with ease, transparency and increasing value for all its stakeholders.

Our two main revenue sources are:

- We retain a small administration fee as rakes when our users purchase $FLOP tokens. This is done to cover our admin and operational costs, much like traditional poker rooms.
- The cryptocurrency used in our poker rooms will grow in value with the strengthening of the platform and its ecosystem, which means that we will grow only when our customers.

Cryptocurrency used in poker rooms

- In ArbiCard Poker rooms, gamers can play with $FLOPs Coin, which are Arbitrum-based tokens. $FLOP token is a cryptocurrency initiated for our poker rooms.
- It will be listed on exchanges to ensure that users get value on the currency they hold, and so that users can easily purchase or exchange funds, no matter where they reside.
- For playing, online players can add funds to their poker accounts or make withdrawals easily and quickly. It takes only a few seconds to transfer funds.

Movement of funds

- Our aim is to maximise our gamer's returns. Out of the total tokens available in the system, ten percent are reserved for encouraging more players to play and for maintaining liquidity in poker rooms.
- This is done by attracting players through higher tournament guarantees, leader boards and freerolls.
- This will also bring in new players, adding to the overall value of the currency and hence that of the currency held by the Players.
- Besides this, 35% of the rakes we collect every month will be distributed back to the players in the form of bonuses and improved tournament pools to improve liquidity.
- This will be done transparently and fairly to encourage recreational gamers.
- With the cumulative effect of larger pool of players and increased value of the currency, larger benefits will be available to gamers, which will attract more players, which will again raise the value of the currency.
- This will make it a self-feeding system.

Poker tournament

- Once the new software and site is completed, a tournament with attractive guarantees will be hosted on the platform to attract new players and to encourage all the players on the platform to initiate play, to start building value in poker rooms.
- During the tournament, 2% of the $FLOP tokens in the system will be distributed as tournament prize pools.
- These bonuses and attractive prizes will attract new players to join our poker rooms, adding to the value of the whole ecosystem.

Games and rake at ArbiCard Poker

- Gamers can play Texas Hold'em.
- Higher limit games and games requiring higher liquidity will be available as the community gets stronger.
- Our rake rate on cash games is only 2.5%, with ceilings set for different limit games. This will encourage gamers willing to play high-stake recreational games.
- Lower rake is more in favour of recreational players and less in favour of smart money that gets more rakeback. Also, smart money players often cash out the rakebacks, leading to reduced liquidity in the ecosystem.

Distribution of 35% monthly revenue

- We will distribute 35% of the rakes we collect every month to the gamers through various avenues:

  - *Jackpots*
  - *Bounty for bringing in new players*
  - *Leaderboard rewards for regular gamers*
  - *Tournament guarantees*
  - *Loyalty programmes to reward regular and old players.*

- This will encourage existing players to play more to collect points that can be redeemed for $FLOPs. However, the system will ensure that only recreational players benefit from this programme.

ArbiCard Poker's development plan

First quarter from our launch

- *Stake system for ArbiCard and $FLOPs Coin*

- *Software developing*

Second quarter

- *ArbiCard Poker rooms powered with $FLOPs tokens*

- *Improved security programme with the feature of player-enabled alerts about suspicious activities*

- *Advanced random number generation*

Third quarter

- *Algorithms to detect collusion and bot-enabled activity*

- *Bounty programme*

Fourth quarter

- *New games*

- *Loyalty programme*

Fifth quarter

- *Casino*

The play rooms

ArbiCard Poker rooms are available online for players to join. You can play on the platform right away with play money. You can play from anywhere, with anybody in the world.

Games and features

- We will keep adding new games to attract different types of recreational gamers. Our security and game features will keep the environment fun and healthy.
- If you want, you can sell this card on the Trove market for Ethereum.
- A transparent and efficient platform and a healthy community is what we aim for, therefore the Ethereum collected at the mint will be used in the following manner:
- 60% of the Ethereum will go towards development, maintenance and upgradation of the platform, servers, application integrations, etc.
- 15% percent of the Ethereum will be used for promoting the platform through various channels to encourage online gamers to play on ArbiCard Poker, so that the size and value of our platform increases.
- The rest 25% of the Ethereum will be reserved for the team, advisors and ambassadors of the platforms for rendering their valuable services.

ArbiCard Poker team

Our team is a wonderful mix of Cryptocurrency enthusiasts and poker lovers. They know how to mix business with pleasure, and they are putting in their heart and soul to create a platform that is both fun and value generating for online gamers.
